

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A non-woven hydroentangled textile formed in cross-section with a central area of low basis weight ~~mass fiber density~~ surrounded on both sides by areas of higher basis weight~~mass fiber density~~.

Claim 2 (original): The textile according to claim 1 which cannot be separated into multiple layers after formation without destruction of the textile.

Claim 3 (currently amended): The textile according to claim 1 wherein the areas of higher basis weight ~~mass fiber density~~ on both sides relative to the central area of low basis weight ~~mass fiber density~~ have a basis weight ratio ranging from about 10:1 to about 1:2 2:1.

Claim 4 (currently amended): The textile according to claim 3 wherein the ratio ranges from about 6:1 to 1:1 2:1.

Claim 5 (original): The textile according to claim 1 wherein the Air Permeability ranges from about 300 to about 1,000.

Claim 6 (original): A process for the manufacture of a non-woven hydroentangled textile comprising:

- (i) feeding a fibrous screen modifying textile substrate into a hydroentangling unit;
- (ii) feeding a loose random assembly of fibers into the hydroentangling unit, a portion of the assembly of fibers being deposited over and another portion of the assembly of fibers being deposited under the screen modifying textile substrate thereby forming a layered fibrous assembly;
- (iii) applying a high velocity water jet to the layered fibrous assembly within the hydroentangling unit; and
- (iv) transporting a resultant hydroentangled layered fibrous assembly to a drying area.

Claim 7 (currentl amended): A personal cleansing article comprising:

- a) a non-woven hydroentangled textile formed in cross-section with a central area of low basis weight ~~mass fiber density~~ surrounded on both sides by areas of higher basis weight ~~mass fiber density~~; and
- (b) a personal cleansing composition comprising a lathering surfactant deposited onto, impregnated into or at least being partially enclosed by the textile.

Claim 8 (original): The article according to claim 4 wherein the lathering surfactant is present in amount from about 0.1 to about 30% by weight of the composition.

Claim 9 (original): The article according to claim 4 wherein the personal cleansing composition further comprises from about 0.1 to about 35% by weight of a water-soluble or water-insoluble skin conditioning agent.

Claim 10 (original): The article according to claim 4 wherein the personal cleansing composition further comprises effervescent ingredients capable of generating a foam upon contact with water.

Claim 11 (original): The article according to claim 7 wherein the effervescent ingredients comprise an acid and a bicarbonate salt.

Claim 12 (currently amended): The article according to claim 7 wherein the areas of higher basis weight ~~mass fiber density~~ on both sides relative to the central area of low basis weight ~~mass fiber density~~ have a basis weight ratio ranging from about 10:1 to about ~~4:2~~ 2:1.
